PROJECTS

Review It Yourself | *Web Developer* | github.com/labs13-how-to

RIY aims to provide a central location for anyone looking to find reliable and highly rated projects reviewed and tested by users like themselves.

- Created fully functional web application with a team of three other web developers, a user experience designer, and an iOS developer
- Created API using Node.js and Express to work alongside our Postgres database
- Utilized Cloudinary to implement image uploading functionality
